

# Field Hours Policy and Regulations (M.S. in A.T.)

Each semester hour of credit requires a minimum of 100 contact hours. All clinical assignments will be made by the Clinical Education Coordinator in consultation with the Director of the AT Program and with feedback from the current preceptors used by the AT Program. These clinical rotations, however, can be subject to change due to loss of affiliate clinical sites, unqualified personnel employed at the site, or other factors beyond the control of the AT Program. If and when this is the case and the ATS clinical rotation needs to be changed, then the ATS will be notified as soon as possible.
